

Partner Datasheet

CNL Software & Pelco by Schneider

Pelco produces some of the security industry's most respected products, offering discreet camera domes and enclosures, megapixel cameras, IP solutions and next-generation digital video recorders. CNL's Technology partnership with Pelco ensures complete compatibility with a wide range of Pelco products.

IPSecurityCenter™ aggregates intelligence from all security systems, including industry leading product from Pelco. This allows organizations to use the best of breed products to create a seamless integrated management system, giving complete visibility of all security assets in one interface.

It enables organizations to enforce compliance to their security policies, whilst maximizing their investment in existing equipment and creating significant cost savings through efficient use of all security resources. Significantly, it allows intelligence from these systems, whether audio, video or data to be connected to other business systems to create real business value.

The ongoing partnership between Pelco and CNL ensures users have greater functionality, easier use and faster customization of specific functions.

by Schneider Electric

Integrated

- Endura Series
- DX800 Series
- Pelco D + P PTZ Protocol
- Pelco KDB Keyboard

Benefits

- Allows hybrid systems
- Automated virtual tours
- Customizable GUI
- Intelligent alarm management
- Large scale video wall integrations
- Multi vendor support
- Permissions based access
- Powerful scripting and automation
- Video mapping with GIS support
- Video related alarms

IPSecurityCenter™ Working with Pelco Products Example Workflow

IPSecurityCenter receives an alarm from a remote fire panel

IPSecurityCenter displays the alarm to the operator

The operator handles the alarm - IPSecurityCenter provides the operator with process guidance to handle the incident

Via the workflow engine, the nearest cameras to the incident along with any associated controls are automatically presented to the operator

IPSecurityCenter automatically initiates a phone call to the emergency response team (ERT)

IPSecurityCenter guides the operator through every step of the company policy, automatically logging each action for auditing and reporting

END

About CNL Software

CNL is a world leader in developing Physical Security Information Management (PSIM) software. Its award winning technology is deployed to secure cities, critical resources and global commerce. CNL's software sits at the heart of some of the largest, most complex and ground-breaking security integration and business value initiatives in the world. Their work with leading organisations is helping to shape the future of security by offering thought leadership on key issues such as energy reduction, process compliance and business advantage in converged environments.
