

Case Study: IBM UK

The Challenge:

IBM UK has 20,000+ employees, spread across 26 locations. The challenge was to provide IBM with a method of ensuring consistent levels of security across all locations in the UK. IBM needed to ensure better visibility of threats to all of their sites, assets and people. The solution was required to rationalize the number of control rooms, which would generate a rapid return on investment, provide improved efficiency and reduce on-going costs.

Integrating:

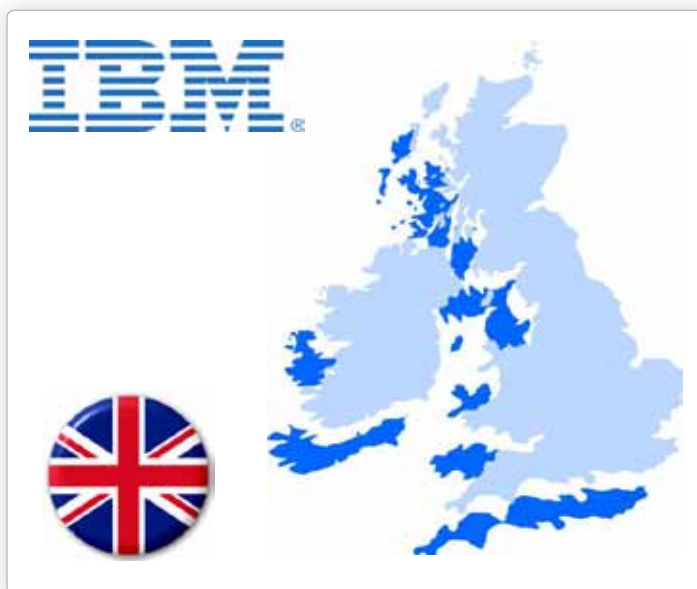

- GE PicturePerfect 4.0 – Access Control
- Visimetrics – Video Management
- Milestone – Video Management
- Siemens – GSM Modem
- 360 Vision - Matrix
- VCL - Matrix
- Vicon - Matrix
- Barco - Video Wall
