

Case Study: Cleveland Water Department

The Challenge:

Cleveland Water Department (CWD) is the 8th largest water facility in the US, serving the city of Cleveland and its surrounding areas, and currently supplies 397,707 residential and 14,876 commercial customers. The solution will enable CWD to protect residents from a wide range of security risks such as contamination due to activism, terrorism or criminal activity.

Integrating:

The IPSecurityCenter™ integrated security management solution delivers the risk management, security control and co-ordinated response needed by CWD. IPSecurityCenter provides enhanced security, greater control, significant operational efficiencies combining manufacturer-independent integration of applications and devices into one process-driven security solution – offering customized and dynamic visual presentation with audit able reports.
