

**For Immediate Release****CNL Software Supports the Security Agenda at IFSEC India 2011**

**GLOBAL RELEASE – December 1, 2011 – CNL Software, a world leader in Physical Security Information Management (PSIM) software, is pleased to announce that it will attend IFSEC India in Pragati Maidan, New Delhi between the 8<sup>th</sup> and 10<sup>th</sup> December 2011. IFSEC India 2011 is aimed at bringing together security experts from various industries including financial services, infrastructure, public safety, law enforcement, retail, realty and hospitality – all searching for the latest products and services in the security market.**

The recent spate of incidents involving repetitive terrorist attacks across various Indian cities has pushed India into the limelight, and has also accelerated the need for better use of security technologies. The increasing threat of terrorism not only in India but worldwide has meant that efficient, reliable protection and security systems will be high on the agenda at the show.

“In our experience India has been one of the early adopters of PSIM software, in fact we have had deployments of our software in India going back to 2008. Since then we have increased, our End User base there with a number of large corporate and campus security programs that are using our IPSecurityCenter™ PSIM software to help protect people, assets and infrastructure.”, says Adlan Hussain, Marketing Manager at CNL Software. “IPSecurityCenter has enabled customers to bring together disparate security systems, products and sensors to create state-of-the-art control rooms providing the highest level of security as well as faster, more precise response to incidents or threats”.

IFSEC India 2011 is moving back to New Delhi - “The Capital of India” and the event will take place from 08-10 December 2011 at Pragati Maidan. This year's show will be the biggest IFSEC event to ever take place in India, it will serve the needs of security, fire and homeland Security professionals.

IFSEC India 2011 in partnership with ASSOCHAM will also feature the Homeland Security India Conference titled “War against terror- A challenge to our Homeland Security ”. The Homeland Security India Conference 2011 is a vital event for all homeland and commercial security professionals in both the public and private sector in India. The Conference will focus on the advice, solutions and systems required for vigilance and security and speakers will represent both Central and State Governments. CNL Software will be located on booth A162, for more information and to register your place at IFSEC India, visit <http://www.ifsecindia.com>

###

**About IFSEC India**

IFSEC India along with Homeland Security India is the leading commercial, homeland security & fire technology show of India, which provides a route to market for the South Asian region, making accessible the latest industry information and innovations in technology. The show also offers the ideal platform to gather invaluable tailored support and advice and exchange best practice.
