

For Immediate Release

CNL Software and Lantern Software and Systems to Partner as Part of Continuing Commitment to PSIM in the Middle East

GLOBAL RELEASE – December 20, 2011 – CNL Software, a world leader in Physical Security Information Management (PSIM) software, and Lantern Software and Systems, a leading system integration solution specialist in the Gulf region, announces its partnership to offer innovative PSIM solutions in the Middle East.

Lantern Software and Systems specialises in providing integrated business solutions that focus on combining disparate networks, physical security and business management systems to meet objectives such as increasing operational efficiency and reducing on-going costs. IPSecurityCenter™ PSIM from CNL Software will enhance Lantern's range of solutions by providing a software based integration and management platform that brings together all existing systems under a centralised, compliant, command and control interface.

“We provide high quality integrated security solutions comprising diverse systems including CCTV surveillance, access control and intrusion detection designed to suit the hazardous and industrial environments of pipeline and plant projects in particular”, explains Jabir Shah Hameed, CEO of Lantern Software and Systems. “IPSecurityCenter provides us with an “off-the-shelf” platform to integrate all the technologies into one solution for our customers, which is exactly what they want; a single interface pulling everything together and enabling sophisticated C4i functionality at a fraction of the price of bespoke system”.

“The impact of the current global economy has resulted in organisations looking for ways to reduce costs, but increase security. This has resulted in a significant increase in demand for our PSIM solutions from police forces, governments and critical infrastructure in the Middle East. As a result CNL is continuing to strengthen its channel in the region, by partnering with solutions providers like Lantern”, says Ramon Grado, CNL Software's Director Sales for the Middle East. “We look forward to working with Lantern on more projects, in the New Year”.

CNL Software's a flagship project in Middle East is responsible for securing a significant proportion of the region's oil. IPSecurityCenter integrates the entire physical security infrastructure including: access control, multivendor CCTV, perimeter detection, fire alarm inputs, IP based Intercom, sea and ground based radar detection & GIS/GPS tracking of vehicles & sea based vessels.

###

About Lantern Software and Systems

Lantern Systems is system integration solution specialist operating from Saudi Arabia, covering the Gulf region with expertise in a comprehensive range of solutions spanning the fields of Physical Integrated Security Management Systems, data acquisition and data handling, communication and environmental systems. Lantern offers Infrastructure Technology Solutions, which encompass the entire range of corporate activities so that objectives such as increasing efficiency and reducing costs can be attained in a comprehensive way.
