

For Immediate Release

CNL Software to Demonstrate PSIM Software at Intersec in Dubai

GLOBAL RELEASE – January 6, 2012 – CNL Software, a world leader in Physical Security Information Management (PSIM) software, is pleased to announce that it will attend Intersec 2012 in the Dubai International Convention & Exhibition Centre, UAE between the 15th and 17th January 2012. Established for over 13 years, Intersec is the leading regional trade event in the security, safety and protection industries. It features four vertical sections, Commercial & Information Security; Homeland Security & Policing; Safety & Health and Fire & Rescue, providing an up to date reflection of the industry portfolio and the latest trends.

CNL Software recently announced its expansion program in the Middle East with the introduction of a new Director of Sales for the region, Ramon Grado. Additionally, CNL Software has a flagship project in Middle East responsible for securing a significant proportion of the region's oil. It has also recently strengthened its channel to support increasing demand for its PSIM solutions from police forces, governments and corporate enterprise within the GCC region.

“Following events in the region last year, Safe City projects are starting to emerge as governments look to ensure the safety and security of cities across the region. PSIM has proven to be the most cost effective method of creating command and control centers to integrate and manage city wide visual, data and resource intelligence.”, says Adlan Hussain, Marketing Manager at CNL Software. “This is in addition to strong demand for PSIM solutions from a wide range of Critical National Infrastructure projects, including telecommunications, mining, petrochemical and transportation hubs.”

Over the years Intersec trade fair and conference has garnered much support from government entities, particularly UAE Civil Defense, all departments of Dubai Police, Dubai Police Academy and the event continues to attract the key players from across its different sectors.

CNL Software will be demonstrating the latest version of its leading PSIM software, IPSecurityCenter. For more information please contact marketing@cnlsoftware.com.

###

About Intersec

Established for over 13 years, Intersec is the leading regional trade event in the security, safety and protection industries. It features a brand profile of 4 niche vertical sections, namely: Commercial & Information Security; Homeland Security & Policing; Safety & Health and Fire & Rescue, providing an up to date reflection of the industry portfolio and the latest trends.

This year Intersec grew by 25% and we endeavour to build further on this growth for the 2012 edition which will take place from 15 to 17 January. The event will now feature an additional hall where the Homeland Security & Policing section will be placed providing easy access to all for exploring the difference niche areas of the event. For more information and to register your place at Intersec, visit <http://www.intersecexpo.com>.

About CNL Software

CNL Software is a world leader in Physical Security Information Management (PSIM) software. Its award winning technology is deployed to secure cities, critical resources and global commerce.
